Trip Introduction

Mt Annapurna Expedition is the eleventh most elevated mountain on the planet at 8091m. The summit is on the western region of Nepal. It is a massif in the Himalayas in north-focal Nepal that includes one peak more than 8,000 meters (26,000 ft). Thirteen tops more than 7,000 meters (23,000 ft), and sixteen progressively more than 6,000 meters (20,000 ft). The massif is 55 kilometers (34 mi) long. Furthermore, is limited by the Kali Gandaki Gorge on the west. The Marshyangdi River on the north and east, and by Pokhara Valley on the south. At the western end the massif encases a high bowl called the Annapurna Sanctuary. Annapurna I Main is the tenth most astounding mountain on the planet at 8,091 meters (26,545 ft) above sea level. So we offer you **Mt Annapurna Expedition**.

Annapurna I is considered to be one of the most dangerous mountain to climb after **Kanchenjunga** and K2. The climbing of Annapurna features pretty steep climbs, glacier walking, risks of avalanches and trailing by way of fixed ropes. The dangers of frostbite and gangrene on the ascent are maximum on the **Annapurna**. **Annapurna I** was the first *8000m* to be climbed via Southeast ridge in *1950* by a **French** expedition headed by **Maurice Herzog** and **Louis Lachenal** among others. The south face of **Annapurna** was first climbed in *1970* by a **British** expedition led by **Chris Bonington**.

Expectation that you will join this **Annapurna Expedition** we can be companion an offer convention and much all the more reasoning. This is additionally jump on rundown on over the eight thousand meter mountains. You can have great time while ascending the mountain with warm and great friendliness.
