Trip Introduction

The **Koshi Tappu Wildlife Reserve** lies in the Terai of eastern Nepal covering a territory 175 km² (68 sq mi). It is arranged on the flood fields of the Sapta-Koshi in Saptari and Sunsari Districts of Eastern Nepal. This is the main National Park of Nepal built up in 1973 to safeguard an extraordinary biological system altogether important to the entire world. **Koshi Tappu Wildlife Reserve** is one of the best birding region in Asia. It is famous best area for birding. Birds sweethearts touch base here looking for delightful flying creatures. The flying creature in koshi are: Comb Duck, Falcated Duck, Whit-followed Eagle, Imperial Eagle, Lesser Kestrel, Bristle Grassbird, Striated Grassbird, Swamp, Cotton Pigmy Goose, Ruddy Crake, Greater Painted Snipe, Indian Courser, Black-necked Stork, Lesser Adjutant, Falcated Duck, Yellow-wattled Lapwing, Baer's Crake, Pheasant-followed jacana, Striated Grassbird etc. It is home of imperiled creatures like wild bison wild pig, hoard deer, spotted deer, blue ringer and jackal, Gharial Crocodile and Gangetic dolphin and so on. It has one of only a handful couple of elephant stables of Asia.

The inclusion of fields is 68%, contrasted with just about 6% of timberland, which is secured by Sisso, Patches of Khair backwoods. Somewhere in the range of 514 types of plants are found including Kapok, Sugarcane, reed, Cattail, Imperata cylindrica, eel grass and types of Eichornia, Hydrilla, Azolla and Lotus. A wide scope of faunal species occupy the ensured region. In this water courses and lakes, 200 types of fish have been recorded. We can see frog, reptile, bird, turtle, Gharial and Mugger crocodile happen too. For the most part understudies used to come in visits to visit this territory, where they can appreciate winged creature watching strolls, elephant rides, pontoon excursions, settlement and dinners at the rose camps inside the parks, town walk, delicate untamed life boating.
