Trip Introduction

Ultralight Flight in Pokhara was presented in Nepal in 1996 and has been putting forth visits in and around Pokhara valley from Pokhara airplane terminal. In light of the vicinity of the mountains and the picturesque lake, Pokhara is the proper spot for this movement as they share airspace with Himalayan griffin vultures, birds, kites and buoy over towns, religious communities, sanctuaries, lakes and wilderness, with a fabulous perspective on the superb Himalayas. For the individuals who wish they could fly like winged creatures, this flight is an absolute necessity. The flights are worked toward the beginning of the day from dawn till 11am and from 3pm till dusk in the months from September till June. It flies at the speed of 50-130kms/hr relying upon wind course and speed. It can even take off and land in a field or on an earth street. The air ship seats two; a traveler and a pilot as it were.

Ultralight flight Pokhara is a unique way to discover the majestic Himalayas and for the Ariel sightseeing of Pokhara valley. In this flight, it is used very light aircraft which has no window and seating for only two persons, including a pilot and a passenger. Powered by

engines these aircraft can reach very close to the mountain peaks. For more information please [CONTACT US](#).
